

Week 1: Basics and Selection

Task 1

Read the task statement “Your Ride Is Here” and see if you can solve it. When you’re done, upload your code to Github and I’ll run your solution through the USACO autograder and let you know how the code performed.

Task 2

Read the problem statement “Gerald Is Into Art” at <http://codeforces.com/problemset/problem/560/B> and see if you can solve it. When you’re done, upload your code to Github and I’ll run your solution through the Codeforces autograder and let you know how the code performed. You can also create your own Codeforces account and submit it yourself. Read through the explanation of the sample test and make sure you cover all the cases!
